DETAILED ACTION

Response to Amendments

Applicant's amendment filed on 10/6/2005 has been considered and entered. As a result of canceling claims 9 and 18 and amending claims 1, 10, 12, and 20, the 35 U.S.C 102 rejections have been overcome.

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Allowable Subject Matter

Claims 1-8; 10-17 and 19-22 are allowable.

The following is an examiner's statement of reasons for allowance: Claim 1 is allowed over the prior art of record. The prior art of record, considered individually or in combination, fails to fairly show or suggest the claimed multi-stage amplifier comprising, among other limitations, a novel and unobvious limitations of "wherein: the method is performed in an equalizer operable to compensate for attenuation in an input signal; and the gain of the multi-stage amplifier is controlled by an adaptive controller of the equalizer" structurally and functionally interconnected with other limitations in the manner as cited in claims 2-8 and 10-11.

Claim 12 is allowed over the prior art of record. The prior art of record, considered individually or in combination, fails to fairly show or suggest the claimed

multi-stage amplifier comprising, among other limitations, a novel and unobvious limitations of “wherein: the method is performed in an equalizer operable to compensate for attenuation in an input signal; and the gain of the multi-stage amplifier is controlled by an adaptive controller of the equalizer” structurally and functionally interconnected with other limitations in the manner as cited in claims 13-17 and 19.

Claim 20 is allowed over the prior art of record. The prior art of record, considered individually or in combination, fails to fairly show or suggest the claimed multi-stage amplifier comprising, among other limitations, a novel and unobvious limitations of “wherein: the method is performed in an equalizer operable to compensate for attenuation in an input signal; and the gain of the multi-stage amplifier is controlled by an adaptive controller of the equalizer” structurally and functionally interconnected with other limitations in the manner as cited in claims 21-22.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
